[Contact](#)

Some of our software products have separate versions for personal computers and servers. The products with no specified license version run on both of these.

### Workstation License

The Workstation version is intended for use on personal computers and laptops running Windows 10, 8, 7, Vista & XP and therefore does NOT run on a Windows Server operating system.

### Server License

A Server License is required to use the program on a Windows Server operating system 2012 (R2), SBS 2011, 2008 (R2) & 2003! The Server Version does not run on workstations. Otherwise, its features are the same as those of the Workstation Version.

### Z-Software – Modular Design

The modular design of our software gives you the advantage that you pay only for the licenses that you actually need, save money on your backup solution and are later able to extend your system dynamically!
